

Internship opportunities for students

We offer exciting internship opportunities for students to gain practical training in the pharmaceutical industry and hospitals. This experience enhances their knowledge and provides valuable insights into the current trends shaping the pharmaceutical sector. Interested students can apply by filling out the summer training program application form, expressing their specific area of interest.

A dedicated committee thoughtfully evaluates each student's preferences and allocates them to their desired training areas. Upon successfully completing the internship, students are encouraged to share their enriching experiences with their peers.

Participants are awarded formal certificates in recognition of their successful completion of the training program. These certificates are meticulously collected and filed for future reference, acknowledging the students accomplishments.
